Subject Index of Volume 78

Abies wood
steady-state and dynamic fluorescence emission from Abies wood, 275
Absorption
excimer formation in 1-pyrenyl-methane-amine, 229
Acetophenone moieties
synthesis and photolysis of polymers containing crowned acetophenone moieties, 185
Acridine orange
energy transfer and formation of exciplex between thiacyanine and acridine orange facilitated by anionic biopolymers and synthetic polymers, 31
Anionic biopolymers
energy transfer and formation of exciplex between thiacyanine and acridine orange facilitated by anionic biopolymers and synthetic polymers, 31
Anthracene
effect of a steric spacer on chromophoric interactions of ruthenium complexes containing covalently bound anthracene, 119
electronic and photochemical behavior of some conformationally restricted intramolecular charge transfer systems, 201

Benzene
electronic energy transfer between benzene and biacetyl in a supersonic jet expansion, 101
Benzidine
triplet states of symmetrically disubstituted biphenyl derivatives. Triplet exciplex formation between benzophenone triplet and benzidine, 221
Benzophenone triplet
triplet states of symmetrically disubstituted biphenyl derivatives. Triplet exciplex formation between benzophenone triplet and benzidine, 221
Biacetyl
electronic energy transfer between benzene and biacetyl in a supersonic jet expansion, 101
Biphenyl derivatives
triplet states of symmetrically disubstituted biphenyl derivatives. Triplet exciplex formation between benzophenone triplet and benzidine, 221

C120–$Ru(bpy)_3^{2+}$
luminescence behaviour of C120–$Ru(bpy)_3^{2+}$ donor–quencher pair in aqueous solutions, 231
Carbanion
unusual (1, 2) Wittig rearrangement of a carbanion generated in neutral aqueous medium by photodecarboxylation of a phenoxyacetic acid analogue, 149
Carotenoid films
organized carotenoid films: excited states and dual emissions, 253
Cetyltrimethylammonium bromide
excited-state, proton-transfer reactions of substituted naphthols in micelles. Comparative study of reactions of 2-naphthol and its long-chain alkyl derivatives in micellar solutions of cetyltrimethylammonium bromide, 39

Charge transfer
electronic and photochemical behavior of some conformationally restricted intramolecular charge transfer systems, 201
Chl *a*
fluorescence of aggregated forms of Chl *a* in various media, 49
Chl *b*
fluorescence of aggregated forms of Chl *a* in various media, 49
Chromophoric interactions
effect of a steric spacer on chromophoric interactions of ruthenium complexes containing covalently bound anthracene, 119
Cleavage photoinitiators
new cleavage photoinitiators for radical polymerization. 2. Synthesis and photochemical study of dihydroxy derivatives of dibenzoylmethane, 79
Colour-change
photoisomerization and thermoisomerization. III. *tert*-Butyl method of selective preparation of photochromic crystalline salicylideneanilines and elucidation of substituent effects on the kinetics of the colour-change process, 71
2-Cyanofuran
photochemistry of 2-cyanofuran, 15
3-Cyanofuran
photochemistry of 2-cyanofuran, 15
Cyclodextrin
modification of an intermolecular photoreaction by cyclodextrin: the photohydroxylation of 3-nitroanisole, 57
non-covalent polymers of oxadiazole derivatives induced by γ-cyclodextrin in aqueous solutions — fluorescence study, 161

D_2O
the influence of D_2O on the photophysical properties of meso-tetra(4-sulphonatophenyl) porphine, Photosan III and tetrasulphonated aluminium and zinc phthalocyanines, 215
Dibenzoylmethane
new cleavage photoinitiators for radical polymerization. 2. Synthesis and photochemical study of dihydroxy derivatives of dibenzoylmethane, 79
Diels-Alder addition
photochemistry of 2-cyanofuran, 15
Dihydroxy derivatives
new cleavage photoinitiators for radical polymerization. 2. Synthesis and photochemical study of dihydroxy derivatives of dibenzoylmethane, 79
1,3-Diketonates
energy transfer processes in the quenching of triplet states of organic compounds by 1,3-diketonates of lanthanides(III) and magnesium(II) in acetonitrile solution. Laser flash photolysis studies, 7
Diketopiperazines
fluorescence lifetime measurements on some tryptophan-containing diketopiperazines, 209

Donor–quencher
luminescence behaviour of C120–Ru(bpy)$_3^{2+}$ donor–quencher pair in aqueous solutions, 231
Dual emissions
organized carotenoid films: excited states and dual emissions, 253
Dye-sensitized oxidation
dye-sensitized oxidation of tetramethylpiperidines (HALS) to *N*-oxyls, 19
Dynamic fluorescence
steady-state and dynamic fluorescence emission from Abies wood, 275

Electron transfer
is ΔG_{et} really the main factor governing photoinduced electron transfer rates?, 1
Energy transfer
energy transfer processes in the quenching of triplet states of organic compounds by 1,3-diketonates of lanthanides(III) and magnesium(II) in acetonitrile solution. Laser flash photolysis studies, 7
energy transfer and formation of exciplex between thiacyanine and acridine orange facilitated by anionic biopolymers and synthetic polymers, 31
electronic energy transfer between benzene and biacetyl in a supersonic jet expansion, 101
EPR determination
the UV–H_2O_2 process: quantitative EPR determination of radical concentrations, 259
Excimer formation
excimer formation in 1-pyrenyl-methane-amine, 229
Exciplex
energy transfer and formation of exciplex between thiacyanine and acridine orange facilitated by anionic biopolymers and synthetic polymers, 31
Excited-state
excited-state, proton-transfer reactions of substituted naphthols in micelles. Comparative study of reactions of 2-naphthol and its long-chain alkyl derivatives in micellar solutions of cetyltrimethylammonium bromide, 39
the photochemistry of mixed-ligand complexes $(ArS)_2ZnPhen$ with the lowest ligand–ligand charge transfer excited states, 113
organized carotenoid films: excited states and dual emissions, 253

Fluorescence
fluorescence of aggregated forms of Chl *a* in various media, 49
2,6-bis(pyren-1-oyl)pyridine: a new fluorescent probe with a high sensitivity to hydrogen-bonding solvents for the development of selective sensors, 63
proton transfer spectroscopy of 2-(2′-hydroxyphenyl)-imidazole and 2-(2′-hydroxyphenyl)benzimidazole dyes, 127
non-covalent polymers of oxadiazole derivatives induced by γ-cyclodextrin in aqueous solutions – fluorescence study, 161
excimer formation in 1-pyrenyl-methane-amine, 229
Fluorescence anisotropy
influence of adventitious light scattering on fluorescence anisotropy measurements with front-face excitation. Simulation and correction, 193
Fluorescence lifetime
fluorescence lifetime measurements on some tryptophan-containing diketopiperazines, 209
Front-face excitation
influence of adventitious light scattering on fluorescence anisotropy measurements with front-face excitation. Simulation and correction, 193

Gold
experimental set-up for *in-situ* X-ray absorption spectroscopy analysis of photochemical reactions: the photocatalytic reduction of gold on titania, 169

Hydrogen bonding
2,6-bis(pyren-1-oyl)pyridine: a new fluorescent probe with a high sensitivity to hydrogen-bonding solvents for the development of selective sensors, 63
Hydroxyphenylbenzimidazole
proton transfer spectroscopy of 2-(2′-hydroxyphenyl)-imidazole and 2-(2′-hydroxyphenyl)benzimidazole dyes, 127
Hydroxyphenylimidazole
proton transfer spectroscopy of 2-(2′-hydroxyphenyl)-imidazole and 2-(2′-hydroxyphenyl)benzimidazole dyes, 127
Hypocrellin A
studies of the triplet state properties of hypocrellin A by nanosecond flash photolysis, 247

Intermolecular photoreaction
modification of an intermolecular photoreaction by cyclodextrin: the photohydroxylation of 3-nitroanisole, 57
Intramolecular proton transfer
proton transfer spectroscopy of 2-(2′-hydroxyphenyl)imidazole and 2-(2′-hydroxyphenyl)benzimidazole dyes, 127

Kinetics
photoisomerization and thermoisomerization. III. *tert*-Butyl method of selective preparation of photochromic crystalline salicylideneanilines and elucidation of substituent effects on the kinetics of the colour-change process, 71
Kraft black liquor
znO-catalysed photodegradation of kraft black liquor, 267

Lanthanides(III)
energy transfer processes in the quenching of triplet states of organic compounds by 1,3-diketonates of lanthanides(III) and magnesium(II) in acetonitrile solution. Laser flash photolysis studies, 7
Laser dyes
proton transfer spectroscopy of 2-(2′-hydroxyphenyl)-imidazole and 2-(2′-hydroxyphenyl)benzimidazole dyes, 127
Laser flash photolysis
energy transfer processes in the quenching of triplet states of organic compounds by 1,3-diketonates of lanthanides(III) and magnesium(II) in acetonitrile solution. Laser flash photolysis studies, 7
Laser photopolymerization
industrial photochemistry. XXII. Simulation model of the warping of a bar made by laser photopolymerization, 85
Ligand–ligand charge transfer
the photochemistry of mixed-ligand complexes $(ArS)_2ZnPhen$ with the lowest ligand–ligand charge transfer excited states, 113

Light scattering
influence of adventitious light scattering on fluorescence anisotropy measurements with front-face excitation. Simulation and correction, 193
Long-chain alkyl derivatives
excited-state, proton-transfer reactions of substituted naphthols in micelles. Comparative study of reactions of 2-naphthol and its long-chain alkyl derivatives in micellar solutions of cetyltrimethylammonium bromide, 39
Lumichrome
molecular relaxation spectroscopy of lumichrome, 241
Luminescence
luminescence behaviour of C120–$Ru(bpy)_3^{2+}$ donor–quencher pair in aqueous solutions, 231

Magnesium(III)
energy transfer processes in the quenching of triplet states of organic compounds by 1,3-diketonates of lanthanides(III) and magnesium(II) in acetonitrile solution. Laser flash photolysis studies, 7
Meso-tetra(4-sulphonatophenyl) porphine
the influence of D_2O on the photophysical properties of meso-tetra(4-sulphonatophenyl) porphine, Photosan III and tetrasulphonated aluminium and zinc phthalocyanines, 215
Micelles
excited-state, proton-transfer reactions of substituted naphthols in micelles. Comparative study of reactions of 2-naphthol and its long-chain alkyl derivatives in micellar solutions of cetyltrimethylammonium bromide, 39
Mixed-ligand complexes
the photochemistry of mixed-ligand complexes $(ArS)_2ZnPhen$ with the lowest ligand–ligand charge transfer excited states, 113
Molecular relaxation spectroscopy
molecular relaxation spectroscopy of lumichrome, 241

Nanosecond flash photolysis
studies of the triplet state properties of hypocrellin A by nanosecond flash photolysis, 247
2-Naphthol
excited-state, proton-transfer reactions of substituted naphthols in micelles. Comparative study of reactions of 2-naphthol and its long-chain alkyl derivatives in micellar solutions of cetyltrimethylammonium bromide, 39
3-Nitroanisole
modification of an intermolecular photoreaction by cyclodextrin: the photohydroxylation of 3-nitroanisole, 57
Non-covalent polymers
non-covalent polymers of oxadiazole derivatives induced by γ-cyclodextrin in aqueous solutions — fluorescence study, 161
N-oxyls
dye-sensitized oxidation of tetramethylpiperidines (HALS) to *N*-oxyls, 19

Oxadiazole derivatives
non-covalent polymers of oxadiazole derivatives induced by γ-cyclodextrin in aqueous solutions — fluorescence study, 161

Paper
ZnO-catalysed photodegradation of kraft black liquor, 267
pH
pH dependence of the twisted intramolecular charge transfer (TICT) of *p*-*N*,*N*-dimethylaminobenzoic acid in aqueous solution, 205
Phenoxyacetic acid
unusual (1, 2) Wittig rearrangement of a carbanion generated in neutral aqueous medium by photodecarboxylation of a phenoxyacetic acid analogue, 149
Photocatalytic reduction
experimental set-up for *in-situ* X-ray absorption spectroscopy analysis of photochemical reactions: the photocatalytic reduction of gold on titania, 169
Photochromic crystalline salicylideneanilines
photoisomerization and thermoisomerization. III. *tert*-Butyl method of selective preparation of photochromic crystalline salicylideneanilines and elucidation of substituent effects on the kinetics of the colour-change process, 71
Photochromism
irreversible photochromism of spiropyran films at low temperatures, 179
Photodecarboxylation
unusual (1, 2) Wittig rearrangement of a carbanion generated in neutral aqueous medium by photodecarboxylation of a phenoxyacetic acid analogue, 149
Photohydroxylation
modification of an intermolecular photoreaction by cyclodextrin: the photohydroxylation of 3-nitroanisole, 57
Photoisomerization
photoisomerization and thermoisomerization. III. *tert*-Butyl method of selective preparation of photochromic crystalline salicylideneanilines and elucidation of substituent effects on the kinetics of the colour-change process, 71
Photolysis
photolysis of 1-aryl-3,3-dialkyltriazenes, 139
synthesis and photolysis of polymers containing crowned acetophenone moieties, 185
Photosan III
the influence of D_2O on the photophysical properties of meso-tetra(4-sulphonatophenyl) porphine, Photosan III and tetrasulphonated aluminium and zinc phthalocyanines, 215
p-*N*,*N*-dimethylaminobenzoic acid
pH Dependence of the twisted intramolecular charge transfer (TICT) of *p*-*N*,*N*-dimethylaminobenzoic acid in aqueous solution, 205
Polarity
2,6-bis(pyren-1-oyl)pyridine: a new fluorescent probe with a high sensitivity to hydrogen-bonding solvents for the development of selective sensors, 63
Polymers
synthesis and photolysis of polymers containing crowned acetophenone moieties, 185
Probes
2,6-bis(pyren-1-oyl)pyridine: a new fluorescent probe with a high sensitivity to hydrogen-bonding solvents for the development of selective sensors, 63
Proton-transfer reactions
excited-state, proton-transfer reactions of substituted naphthols in micelles. Comparative study of reactions of 2-naphthol and its long-chain alkyl derivatives in micellar solutions of cetyltrimethylammonium bromide, 39
Pulp
ZnO-catalysed photodegradation of kraft black liquor, 267
1-Pyrenyl-methane-amine
excimer formation in 1-pyrenyl-methane-amine, 229

Quenching
energy transfer processes in the quenching of triplet states of organic compounds by 1,3-diketonates of lanthanides(III) and magnesium(II) in acetonitrile solution. Laser flash photolysis studies, 7

Radical concentrations
the UV–H_2O_2 process: quantitative EPR determination of radical concentrations, 259
Radical polymerization
new cleavage photoinitiators for radical polymerization. 2. Synthesis and photochemical study of dihydroxy derivatives of dibenzoylmethane, 79
Ruthenium complexes
effect of a steric spacer on chromophoric interactions of ruthenium complexes containing covalently bound anthracene, 119

Sensors
2,6-bis(pyren-1-oyl)pyridine: a new fluorescent probe with a high sensitivity to hydrogen-bonding solvents for the development of selective sensors, 63
Spiropyrans
irreversible photochromism of spiropyran films at low temperatures, 179
Steady states
nuclear magnetic resonance and UV spectral probe of photochemical steady states of vitamin K_1, 153
steady-state and dynamic fluorescence emission from Abies wood, 275
Steric spacer
effect of a steric spacer on chromophoric interactions of ruthenium complexes containing covalently bound anthracene, 119
Substituted naphthols
excited-state, proton-transfer reactions of substituted naphthols in micelles. Comparative study of reactions of 2-naphthol and its long-chain alkyl derivatives in micellar solutions of cetyltrimethylammonium bromide, 39
Substitution
photolysis of 1-aryl-3,3-dialkyltriazenes, 139
Supersonic jet expansion
electronic energy transfer between benzene and biacetyl in a supersonic jet expansion, 101
Synthesis
synthesis and photolysis of polymers containing crowned acetophenone moieties, 185
Synthetic polymers
energy transfer and formation of exciplex between thiacyanine and acridine orange facilitated by anionic biopolymers and synthetic polymers, 31

Tetramethylpiperidines
dye-sensitized oxidation of tetramethylpiperidines (HALS) to *N*-oxyls, 19
Tetrasulphonated aluminium
the influence of D_2O on the photophysical properties of meso-tetra(4-sulphonatophenyl) porphine, Photosan III and tetrasulphonated aluminium and zinc phthalocyanines, 215
Thermoisomerization
photoisomerization and thermoisomerization. III. *tert*-Butyl method of selective preparation of photochromic crystalline salicylideneanilines and elucidation of substituent effects on the kinetics of the colour-change process, 71
Thiacyanine
energy transfer and formation of exciplex between thiacyanine and acridine orange facilitated by anionic biopolymers and synthetic polymers, 31
Thionine dye
photoelectrochemical studies of thionine dye in aqueous surfactant solution, 173
Titania
experimental set-up for *in-situ* X-ray absorption spectroscopy analysis of photochemical reactions: the photocatalytic reduction of gold on titania, 169
Triazenes
photolysis of 1-aryl-3,3-dialkyltriazenes, 139
Triplet states
energy transfer processes in the quenching of triplet states of organic compounds by 1,3-diketonates of lanthanides(III) and magnesium(II) in acetonitrile solution. Laser flash photolysis studies, 7
triplet states of symmetrically disubstituted biphenyl derivatives. Triplet exciplex formation between benzophenone triplet and benzidine, 221
studies of the triplet state properties of hypocrellin A by nanosecond flash photolysis, 247
Tryptophan
fluorescence lifetime measurements on some tryptophan-containing diketopiperazines, 209
Twisted intramolecular charge transfer
pH dependence of the twisted intramolecular charge transfer (TICT) of *p*-*N*,*N*-dimethylaminobenzoic acid in aqueous solution, 205

UV–H_2O_2 process
the UV–H_2O_2 process: quantitative EPR determination of radical concentrations, 259

Vitamin K_1
nuclear magnetic resonance and UV spectral probe of photochemical steady states of vitamin K_1, 153

Warping
industrial photochemistry. XXII. Simulation model of the warping of a bar made by laser photopolymerization, 85
(1, 2) Wittig rearrangement
unusual (1, 2) Wittig rearrangement of a carbanion generated in neutral aqueous medium by photodecarboxylation of a phenoxyacetic acid analogue, 149

X-ray absorption spectroscopy
experimental set-up for *in-situ* X-ray absorption spectroscopy analysis of photochemical reactions: the photocatalytic reduction of gold on titania, 169

Zinc
the photochemistry of mixed-ligand complexes $(ArS)_2ZnPhen$ with the lowest ligand–ligand charge transfer excited states, 113
Zinc phthalocyanine
the influence of D_2O on the photophysical properties of meso-tetra(4-sulphonatophenyl) porphine, Photosan III and tetrasulphonated aluminium and zinc phthalocyanines, 215
ZnO-catalyzed photodegradation
ZnO-catalysed photodegradation of kraft black liquor, 267
